

Mass Notification Communications

MN-NETSW1, MN-COM1S

Overview

MN-NETSW1

Four-port Mass Notification multimode fiber optic Ethernet switch

The MN-NETSW1 is an industrial grade, 10/100 Mbps auto-negotiating Ethernet switch used in life safety and mass notification applications to connect EST3's FireWorks workstation to the MN-FVPN VoIP module and/or the MN-COM1S RS-232 interface. The MN-NETSW1 provides four RJ-45 ports for local connections and two full-duplex multimode fiber ports for remote connections.

The MN-NETSW1 has three LED indicators:

- **Power:** On indicates the MN-NETSW1 has power.
- **Link:** On indicates Ethernet link has been established. Flashing indicates link is active.
- **HS:** Indicates data transferring at 100 Mbps.

MN-COM1S

Mass Notification Serial Communications/LAN interface

The MN-COM1S is a TCP/IP to RS-232 interface with one RJ-45 port and one RS-232 port. It is used in mass notification settings to connect a FireWorks workstation to an EST3 control panel.

Both the MN-NETSW1 and the MN-COM1S mount on an MN-BRKT1 or an MN-BRKT3 bracket. These install inside the EST3 control panel or Auxiliary Power Supply for a neat and self-contained mass notification solution.
