EST3X Life Safety Control System

Description

EST3X represents the latest generation of life safety control panels for mid to large sized applications. With large multi-message displays and innovative controls, intuitive interfaces, and bold colored cabinets — these systems capture the imagination, and catch the eye. But behind the LCD display is where they really shine.

New microprocessors and chipsets take full advantage of the latest advances in computing technology, leading to smarter, faster, higher-capacity processing and more efficient designs. EST3X's patented Voltage Boost™ technology, for example, delivers consistent voltage – even at low battery power – resulting in lighter cable requirements and/or longer runs. That saves time and money.

Meanwhile, advanced communications provide integrated IP communications via existing Ethernet networks directly to subscribed central stations. Email and text messaging options enrich this advanced communication environment with instant notification—anywhere, any time.

High performance processing also leads to powerful networking features and versatile digital audio functionality. The wide range of EST3X configurations include standalone operation, networking with up to 64 nodes, or integration with an EST3 network comprising as many as 64 nodes — complete with mass notification capabilities and display of security events

EST3X sets a new standard in front-panel life safety control interfaces. Its exclusive SpeedTouch™ rotary control offers nimble forward and back scrolling through events and options, while a mere tap of the control selects items with a clean fluidity of motion. Its extra-large backlit display reveals up to eight concurrent messages, and switch/LED strips provide ample space for meaningful custom labels. And for end users, large tactile control buttons instill confidence and promote quick response when time is of the essence.

Standard Features

- Up to six intelligent analog loops hosting as many as 1,500
 Signature Series devices per panel
- Optional integrated eight-channel digital audio
- 10 amp power supply with universal 94 to 264 Vac input voltage
- Patented Voltage Boost™ technology delivers consistent voltage — even at low battery power
- Four built-in 3-amp notification/auxiliary circuits
- Large 24-line by 40-character backlit LCD
- Simplified operation with the SpeedTouch™ rotary control
- 65 amp hour battery charger
- 64-node network nodes using copper and/or fiber
- Supports up to 30 R-Series remote annunciators
- Part of an end-to-end audio solution suitable for low frequency signaling in sleeping areas
- Space for up to three additional option cards such as extra SLC loops, amplifiers, or dialer/modem
- Optional Ethernet Interfaces for central station communication, email, and diagnostics
- 1,100 event history log
- Optional earthquake hardening: OSHPD seismic pre-approval for component Importance Factor 1.5
- UL2572 Listed for Mass Notification, UL864 UUKL Listed for Smoke Control, UL864 Listed for releasing applications using SIGA-REL

Application

Application flexibility is where EST3X's computing power is put to best use. This generation of control panels is equally at home as the center of a simple single-building standalone system as it is when part of a sophisticated life safety network serving thousands of points across multiple buildings. Optional voice evacuation bridges the gap left by other mid-range systems.

Strong Networking

Networking is among EST3X's strong suits. Highly efficient RS485 connectivity, plus fiber-optic communications deliver faster response times and more sophisticated diagnostic capabilities, while cost-effective remote annunciation solutions keep basic monitoring and control always within reach

A simple EST3X network can comprise up to 64 nodes – enough to serve the needs of most campuses and larger buildings. Its ability to join an EST3 network with as many as 64 nodes extends EST3X's reach into mass notification applications, security reporting, as well as making it an ideal candidate for retrofits.

High Capacity Audio

EST3X features a full eight channels of integrated digital audio with up to two minutes of on-board programmable message storage. An optional high quality paging microphone gives live access to local, as well as remote, audio functions. Auxiliary inputs are available for mass notification operations, and ZA Series amplifiers may

An optional paging microphone provides local, as well as remote, audio functions.

be mounted directly on the EST3X rail assembly.

High Fidelity Audio Approved for Sleeping Areas

EST3X is part of an end-to-end low frequency/high fidelity solution listed to UL 464 and UL 864. Its audio system approved for code-compliant 520 Hz signaling in sleeping areas when used in conjunction with

- a factory-supplied 520 Hz audio file
- one or more of the following amplifiers: 3-ZA20A, 3-ZA20B, 3-ZA40A, 3-ZA40B, 3-ZA95, SIGA-AA30, SIGA-AA50, 1B3-125, or 1B3-250
- one or more Genesis High Fidelity speakers

Consult the EST3X Compatibility List for details

Scalable IP and Cellular Communications

Several popular third-party IP/Cellular communicators have been tested with the EST3X control panel and are compatibility listed to UL864. The IP/Cellular communicators meet NFPA72 2013 edition requirements for sole or secondary transmission paths. Using IP/Cellular communicators can reduce the cost of ownership by eliminating POTS lines. Please see the EST3X control panel compatibility documentation part number 3101801-EN for a full list of compatible communicators.

Seamless System Integration

EST3X borrows much from it's larger sibling, the venerable EST3 Life Safety Platform. And for good reason: by integrating with the EST3 networking and computing environment, an EST3X control panel can serve as a cost-effective remote node for extinguishing, smoke control, or even mass notification functions — all within the same compliance framework.

Retrofits and expansions benefit enormously from this arrangement, but programming and equipment management for new installations is equally efficient as a result of these shared resources. EST3X will accommodate up to three EST3 modules on its own rail assembly, giving it access to such proven EST3 successes as zoned amplifiers, conventional device circuits, modem communicators, and RS-485 functions. Meanwhile, installers familiar with EST3 configuration will find that the two systems share many of the same programming and diagnostic conventions.

Local and Remote Annunciation

Up to 30 R-Series LCD, LED annunciators and driver interface cards may be configured for each node on the EST3X network. No additional nodes are required for annunciation purposes. In addition, EST3X supports EST3 network annunciators, while GCI and GCIX driver interface cards provide cost-effective graphic annunciation solutions. And all

annunciator inputs and outputs are easily programmable through the rules and labels function of EST3X's Software Definition Utility.

Power to Count On

EDWARDS' patented Voltage Boost™ technology delivers a consistent 22.5 Vdc – even at low battery power. This means lighter gauge cable can be used for equivalent distances compared with conventional power supplies, or longer wire runs on the same gauge cable. Either way, this breakthrough technology saves time and equipment costs, making EST3X not only a high-performance solution — but a cost-effective one as well.

EST3X's four on-board Notification Appliance Circuits are fully synchronized to UL 1971 standards — without the need for external modules or other electronics. It's ample 10-amp power supply is finely tuned to get the most out of EDWARDS' widely-acclaimed low profile Genesis notification appliances.

Dimensions

The backbox is designed for semiflush or surface mounting. Conduit and nail knockouts, keyhole style mounting holes, and wide wiring troughs facilitate efficiency during installation.

Note: Add 0.25 in 0.64 cm. to height and width dimensions to allow for knockouts when framing in the backbox for semiflush mounting.

System Layout

Up to six intelligent analog loops hosting as many as 250 devices each.

Wiring

■ Signature (initiating) Data Circuit

■ Notification Appliance Circuits

Wiring is supervised and power limited.

TB2 terminal marking indicates signal polarity when the circuit is active. Polarity reverses when the circuit is active

For proper circuit supervision, break the wire run at each notification appliance and install the EOL resistor at the end of the circuit.

Do not loop wires around notification appliance terminals.

■ Network data circuit

■ Network data circuit, Class B audio

■ Network data circuit, Class A or Class X audio

Main Component Assembly

EST3X systems are designed for quick assembly and easy access in the field. Components are modular and require no special tools to service or replace.

SFS1-CPU Main Board

The SFS1-CPU main board processes all information from modules installed within the cabinet as well as data received from other panels over the network data riser. When a network card is installed, the CPU employs a command set to determine its type.

SFS1-CPU Specifications

or or o opecinications

Wire size 18 to 12 AWG (0.75 mm² to 2.50 mm²)

Ground fault impedance 10 kΩ

Operating environment

Temperature 32 to 120°F (0 to 49°C)
Relative humidity 0 to 93% noncondensing

Notes

- For battery calculations, standby and alarm currents include all listed primary power supplies.
- The common trouble relay operation does not include AC trouble delay functionality and cannot be used for reporting troubles off premises per UL 864 10th edition.

PS10-4B Power

Supply Card

The PS10-4B Power Supply Card provides the required power and related supervision functions for the control panel, as well as filtered, regulated power to the rail chassis modules. It also provides 24 VDC for operating ancillary equipment.

PS10-4B Specifications

1	PS 10-46 Specification	ა
ľ	Mains voltage	94 to 264 VAC, 50/60 Hz

3-SDC1 Signature Data Circuit Card

Each 3-SDC1 Signature Data
Circuit Card provides one Class
A or Class B signaling line circuit
(SLC1) that supports up to 125
Signature Series detectors and
125 Signature Series module
addresses. These modules

provide connection for powering conventional two-wire smoke detector circuits on Signature Series modules

EST3X comes standard with one 3-SDC1 card installed as SLC1.

An optional second 3-SDC1 card may be installed to provide SLC2, thus doubling system signaling line capacity.

3-SDC1 Specifications

4X-LCD

User Interface

Included in the EST3X basic package, the 4X-LCD provides the user interface for the EST3X system. It connects to the SFS1-CPU main board with a ribbon cable, and attaches to the CPU via hinges. Only one display module is required to provide a point of control for the entire network. Additional displays can be added to any EST3X panel in the network to provide additional points of control.

4X-LCD Specifications

Temperature	32 to 120 °F (0 to 49 °C)
Relative humidity	0 to 93% noncondensing

3X-FIB fiber optic

network module

The 3X-FIB fiber optic network module gives an EST3X panel the ability to network 64 EST3X panels, or interface with an EST3 network. Class A, Class X and Class B connections are supported. The module consists of the adapter card and electronics card.

The 3X-FIB supports the following fiber optic transceivers:

Model	Description	
SMXLO2	Standard output single mode fiber optic transceiver	
SMXHI2	High output single mode fiber optic transceiver	
MMXVR	Standard output multimode fiber optic transceiver	

The 3X-FIB provides terminals for connecting a 24 VDC backup power source to maintain data transmissions in the event the panel is powered down.

Note: All networked panels must have the 3X-FIB network card installed.

3X-FIB8 fiber optionetwork module

The 3X-FIB8 fiber optic network module gives an EST3X panel the ability to network up to eight EST3X nodes. Class A, Class X and Class B connections are supported. The module consists of the adapter card and electronics card.

The 3-FIB8 supports the following fiber optic transceivers:

Model	Description	
SMXLO2	Standard output single mode fiber optic transceiver	
SMXHI2	High output single mode fiber optic transceiver	
MMXVR	Standard output multimode fiber optic transceiver	

The 3X-FIB8 provides terminals for connecting a 24 VDC backup power source to maintain data transmissions in the event the panel is powered down.

Note: All networked panels must have the 3X-FIB8 network card installed.

3X-NET Network

Adapter Card

The 3X-NET network adapter card gives an SFS1-CPU main board the ability to network up to 64 nodes on an EST3 network. The card supports Class B, Class A, and Class X wiring.

The 3X-NET adapter card provides two

independent RS 485 circuits: one for network data communications and one for digital audio communications.

4X-4/3SGYWF 4X-LKF Option Cards	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1.
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDDC1	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDDC1 3-SDC1	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDDC1 3-SDC1 3-SDC1 3-SDC1-HC	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators.
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French Sand Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs Modem/Dialer (DACT)
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs Modem/Dialer (DACT) Addressable Analog Module Initiating Device Circuit Module
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1 3-IDC8/4	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs Modem/Dialer (DACT) Addressable Analog Module
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1 3-IDC8/4 3-LDSM	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs Modem/Dialer (DACT) Addressable Analog Module Initiating Device Circuit Module. LED Display Support Module. Provides interface for one LED/Switch display module. Mounts in an option card slot where no Option cards are installed.
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1 3-IDC8/4 3-LDSM 3-OPS	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs Modem/Dialer (DACT) Addressable Analog Module Initiating Device Circuit Module LED Display Support Module. Provides interface for one LED/Switch display module. Mounts in an option card slot where no Option cards are installed. Off Premises Signaling module
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1 3-IDC8/4 3-LDSM 3-OPS CLA-PS10	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs Modern/Dialer (DACT) Addressable Analog Module Initiating Device Circuit Module LED Display Support Module. Provides interface for one LED/Switch display module. Mounts in an option card slot where no Option cards are installed. Off Premises Signaling module Class A Adapter, PS10 NACs
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1 3-IDC8/4 3-LDSM 3-OPS CLA-PS10 CDR-3	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class B 24 VDC outputs Modern/Dialer (DACT) Addressable Analog Module Initiating Device Circuit Module LED Display Support Module. Provides interface for one LED/Switch display module. Mounts in an option card slot where no Option cards are installed. Off Premises Signaling module Class A Adapter, PS10 NACs PSNI Coder Module
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1 3-IDC8/4 3-LDSM 3-OPS CLA-PS10	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs Modem/Dialer (DACT) Addressable Analog Module Initiating Device Circuit Module LED Display Support Module, Provides interface for one LED/Switch display module. Mounts in an option card slot where no Option cards are installed. Off Premises Signaling module Class A Adapter, PS10 NACs PSNI Coder Module Graphic Annunciator Driver Master, provides outputs for 32 LEDs and connection to common control switches and LEDs for
4X-4/3SGYWF 4X-LKF Option Cards 3X-PMI 3-SSDC1 3-SDC1 3-SDC1 3-SDC1-HC 3-ZA20A 3-ZA20B 3-ZA40A 3-ZA40B 3-MODCOM 3-AADC1 3-IDC8/4 3-LDSM 3-OPS CLA-PS10 CDR-3	LED/Switch Module, four groups of three switches and four LEDs. LED colors: Green, Red, Yellow and White. Label Kit, French s and Interfaces Paging Microphone Interface. See Note 1. Single Signature Driver Controller, c/w one 3-SDC1 Dual Signature Driver Controller, c/w two 3-SDC1s Signature Device Card - expands the 3X base panel to two loops 3-SDC1-HC used with circuits that contain more than 90 isolators. 20 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 20 Watt Zoned Amplifier w/Class B Audio & Class B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class A/B 24 VDC outputs 40 Watt Zoned Amplifier w/Class A/B Audio & Class B 24 VDC outputs Modern/Dialer (DACT) Addressable Analog Module Initiating Device Circuit Module LED Display Support Module. Provides interface for one LED/Switch display module. Mounts in an option card slot where no Option cards are installed. Off Premises Signaling module Class A Adapter, PS10 NACs PSNI Coder Module

Note 1: For ULC 11th edition multiple command center applications add MCC to the PMI SKUs as shown, (3X-PMIMCC, 3X-PMIMCC-FR)

Power Supply, Replacement
Base Electronics, replacement
Main user interface assembly, monochrome. Eight line 1/4 VGA LCD, four controls
plus rotary knob. English language.
Main user interface assembly, monochrome. Eight Line 1/4 VGA LCD, four controls
plus Rotary knob. Insertable language, shipped with English inserts. Order alternate
languages separately.
Blank hinged local rail module door
Replacement door, bronze
Replacement door, red
Backbox, black
Seismic hardening Kit for batteries up to 17Ah.

Note: For earthquake anchorage, including detailed mounting weights and center of gravity detail, please refer to Seismic Application Guide 3101676-EN. Approval of panel anchorage to site structure may require local AHJ, structural, or civil engineer review.
