# Fire Alarm Telephones

EDWARDS fire alarm telephones are rugged communications

devices for emergency use. Enclosed keylocked telephone sta-

tions comprise three separately ordered components: the handset

assembly, the frontplate, and the wallbox. Depending on how the

phones are wired, they are supervised for three or four state op-

eration. Frontplates are available with either metal or break glass

latches and one-state handsets with armoured cords. Warden sta-

Portable handsets plug into one-gang receptacles. Handsets are

available in black or red. The TCS-6 cabinet provides storage for

Firefighters' telephones are typically installed in corridors, lob-

bies, mechanical rooms, stairways, or other stategic locations.

When lifted from its cradle, or plugged into a suitable wall jack, the

handset activates audible and visible signals at the control panel.

There, the operator needs only to lift the handset off the cradle to

respond to the current call. Other firefighters' telephones may be

selected at the control panel to join the conversation.

MEA approved warden stations feature doors with magnetic

tions mount to 6832-1D wallboxes.

## Standard Features

#### Floor Warden Station

- Magnetic latch
- Red powdercoat finish
- 28-inch armored cord
- Supervised wiring
- Flush or surface mount models
- Concealed Hinges
- Four-state model available

#### Frontplate - Break Glass

- Flush or surface mount models
- Red powdercoat finish
- Locking door, concealed hinges
- Break glass insert

#### Frontplate - Non-Break Glass

- Flush or surface mount models
- Red powdercoat finish
- Locking door, concealed hinges
- Metal insert

## Wallbox, 6832-1D

For use with 6830 Warden Stations

- Red powdercoat finish
- Flush or surface mount
- For use with 6831 series front plates
- Flush or surface mount

## **Handset Assembly**

- Red ABS plastic handset
- 60 inch (1500 mm) coiled cord set
- Supervised wiring
- For use with 6831 series front plates
- Four-state models available

### **Portable Handsets and Receptacle**

- Black or red ABS plastic handset
- 60 inch (1500 mm) coiled cord set
- · Supervised wiring
- Four-state models available

up to six handsets.

Application

## Mounting

## Assembly

EDWARDS recommends that these fire alarm communication devices always be installed in accordance with the latest recognized editions of national and local fire alarm codes.

## Typical Wiring

## Telephone Riser Connections, Stations & Assemblies

## Four-state operation

## Three-state operation

#### Notes

- [1] Use jacketed, twisted, shielded pair
- 14 to 22 AWG (2.08 to 0.33 sq mm)
- Max. line impedance: 50 Ohms, 25 Ohms per line
- Connect the shields to chassis ground in the control panel
- Telephone in Use indicator light (NY versions only)

Three-state operation does not comply with UL 864 ninth edition.

Note that the riser polarities for differ between three-state and four-state operation.

## Telephone Riser Connections, Handsets

Four-state operation

Three-state operation

#### Notes

- [1] Use jacketed, twisted, shielded pair
- [2] 14 to 22 AWG (2.08 to 0.33 sq mm)
- [3] Max. line impedance: 50 Ohms, 25 Ohms per line
- [4] Connect the shields to chassis ground in the control panel
- [5] Install a 47 k Ohm EOL resistor on the last unit only

Three-state operation does not comply with UL 864 ninth edition.

Note that the riser polarities for differ between three-state and four-state operation.
